Connection of Technical Signature Devices

In accordance with the regulations in Germany, Austria and France, cash registers require the use of a certified security device. It is required that each receipt of cash transactions is given a cryptographic signature that is related to the signature of the last receipt and that data acquisition protocols (RKSVD-DEP/ DSFinVK) with total storage must be kept. Based on IT as manufacturer and distributor is partner of EPSON and partner of the Fiskaltrust GmbH.

Germany: Kassensicherungsverordnung

Legal Classification

The ‚Kassensicherungsverordnung‘ regulates the implementation of § 146a of the German Fiscal Code. Since 1.1.2020 with a transitional period until 30.9.2020, cash register systems are subject to the obligation to log transactions which have to be included:

1. the time of the beginning of the transaction
2. a unique and sequential transaction number
3. the nature of the transaction
4. data of the transaction
5. the method of payment
6. the time at which the operation was completed or aborted
7. a test value
8. the serial number of the electronic recording system or the serial number of the security module (TSE).

For restaurant tills, this means that a transaction ID must be stored by a certified TSE as soon as a table is opened and for every order up to the point of settlement - regardless of whether payment is made by external means of payment or by booking on the hotel bill. The storage of current business transactions or other transactions within the meaning of § 146a paragraph 1 sentence 1 of the German Fiscal Code must be complete, unchanged and tamper-proof on a non-volatile storage medium.

A standardised data export (DSFin-VK) must be available for transfer to the official of the tax authority entrusted with the cash register review or external audit. Documents must now also contain the serial numbers and TSE IDs, the start and end of the transaction in readable form. For an audit by the tax authorities, the issue of a QR code is recommended, as this also documents the complete concatenation.

A procedural documentation must be kept in the company, for this purpose we supply the technical part of the required documentation and give advice on the necessary supplementation by the cash register operator.

MY POS implements these and all other obligations since version 4.5. This version is a prerequisite for the TSE connection options shown below.

EFSTA and fiskaltrust with Cloud-TSE

Signature creation using a hardware security module (HSM) and all necessary functions are provided online as a cloud service. This enables hardware-independent software solutions. With Fiskaltrust, a

software component (SMAERS) must be operated at the location of the POS system. For EFSTA, the EFR cloud is implemented without a locally installed

component. The legal and technical regulations stipulate that it is not the cash register manufacturer but a specialised provider of technical security equipment (TSE) that develops and certifies the necessary hardware and software.

The cloud TSE used in combination with Fiskaltrust and EFSTA is the fiskaly Cloud TSE. It is 100% software-based fiskaly and, with the completion of the certification process, is the only cloud TSE to have reached the full certification period and is certified until 2029.

Commissioning

1. Ordering and conclusion of contract: As soon as the Cloud TSE is ready for use, the taxable business can order Fiskaltrust with Fiskaly Cloud TSE or EFSTA with Fiskaly Cloud TSE through us. The annual fee is paid via us.
2. FISKALTRUST ONLY: Installation of the middleware: A software component (SMAERS) must be installed on a Windows computer on site at the business.
3. Receipt printers must be network-compatible or make use of the EPSON server-direct print technology or you must assign at least one iHUB printer within your LAN and the printer must be capable of outputting the QR codes of the signature creation device.
4. The fiscalisation method is set up in MY POS Administration by an employee with Admin authorisation.

EFSTA offers an audit-proof archive and data export formats as DSFinVK reports with monitoring.

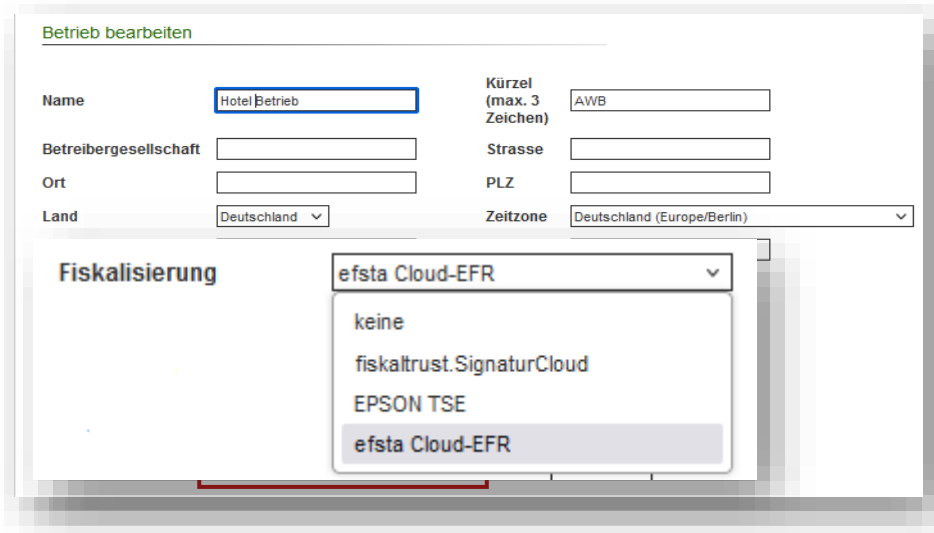

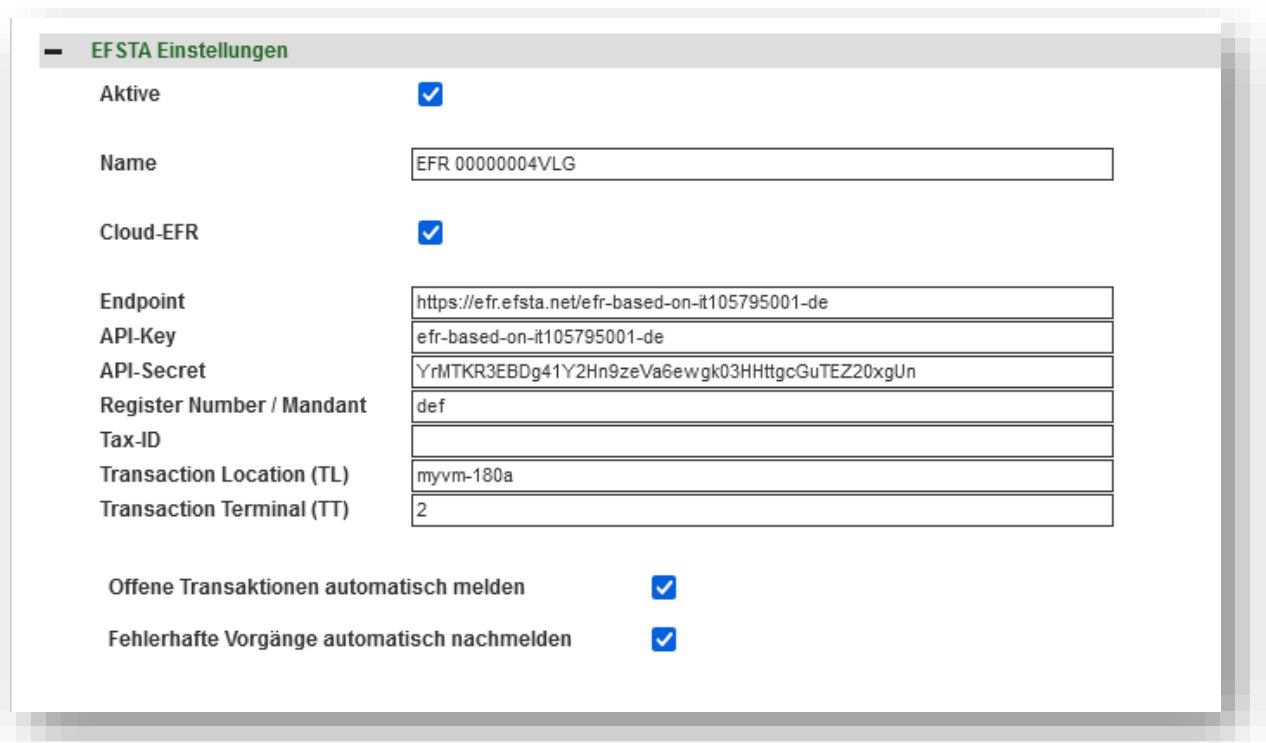

Connection of efsta with Fiskaly Cloud TSE in operation

EFSTA setup begins with the selection of the TSE procedure in MY POS Administration under Master data - Operation:

Once the country has been set, EFSTA is one of the fiscalisation options available. The Admin or Property Admin authorisation is required to edit the setting.

When connecting Efsta fiscalisation with Fiskaly Cloud TSE, the other settings are made separately in each point

of sale of the business. Open the menu item Master data - Point of sale. If EFSTA fiscalisation was previously saved in the company, you will find an EFSTA settings tab. A separate end point is entered for each point of sale, this is the EFSTA Cloud EFR. Here you will also find further options on how to deal with late notifications and unsigned transactions

EFSTA signatures and messages in MY POS Administration

Under the menu item Reports you will find a submenu item EFSTA messages. All notifications for fiscalisation that are open or have been processed are displayed here. You can restrict the search to active, unprocessed reports and open and process the report by clicking on the magnifying glass.

In addition to the MYPOS transaction data, you will also see the corresponding EFSTA transaction data in the transaction data of a document:

After you have set the fiscaltrust connection, you now see a column below with the

Manage Payment Methods

In the settings of the operation, the payment methods of possible payment methods are mapped with the Fiskaltrust payment methods. First select the MYPOS payment method from the list and then assign it to the corresponding payment method stored in Fiskaltrust. Click on the plus symbol on the right-hand side to carry out the transaction for another payment method, or check an existing mapping to delete it. Confirm your entries by clicking on "Apply changes". Bookings to guest accounts and house receipts are fixed mappings.

Not all payment methods available at Fiskaltrust have to be used. Available for selection:

Barzahlung in Landeswahrung/ Barzahlung in Fremdwahrung/ Verrechnungsscheck/
 Bankomatkartenzahlung/ Kreditkartenzahlung/ Gutscheinzahlung/ Sonstige Debit-Karte/ Sonstige

Financial Reports

At least the employee authorization 'Cancellation' is required to process the following notifications.

In certain cases, it is necessary to send notifications to the tax authorities. For example, the monthly and annual report sends summarized notifications.

In the cash register interface, you see the note: "Fiscal trust: There are documents to be printed! Please go to the MY POS administration to the tab 'Printouts' and the button 'Fiscal Trust'".

In the view you see all incidents to which you must react. Each annual document must be created after the last document of the year and before the first document of the following year.

Even if the fiscal year is different, the 31.12. is still considered the key date, but cutting times at the point of sale are allowed as a point in time, as well as earlier charges for seasonal businesses.

In addition to the external storage, confirmation and checking of the declarations within the Fiscal Trust Carefree package recommended by us, MY POS stores all declarations internally and can be viewed under the menu item 'Reports' - 'Fiskaltrust'. Nevertheless, the start and end receipts and

the annual receipt should be printed out, checked and stored. It is possible to reprint lost documents in MY POS at any time.

Fiskaltrust does not provide for a daily closing Z-report, but it is still useful for checking the cash balance.

Find more information at www.fiskaltrust.de/faq/

Post-Registration of transactions due to technical problems

If your Internet connection is down, or the Fiskaltrust interface or the signature creation device in the cloud is not available, documents are created with or without provisional signature. These documents are marked accordingly on the printout and must be reported subsequently.

You will see a notification: "**fiskaltrust: xxxxxx**" in the MY POS Cashpoint Touchscreen. Please go to the MY POS administration to the tab 'Reports' and 'Fiskaltrust Messages'.

The fact that the connection is active again must be confirmed by sending a so-called 'zero receipt'. If there are any documents to be subsequently registered, this is done in unit with the subsequent registration of the documents - we automatically send a zero document for closing.

Otherwise the connection to Fiskaltrust can be reactivated at any time by sending a zero document.

Financial reports and subsequent reporting of receipts in the MY POS Touchscreen interface

In certain cases, it is necessary to send reports to the tax authorities. For example, the monthly and annual report sends summarised reports.

Faults: If your internet connection is disrupted or the EFSTA or Fiskaltrust interface or the signature creation unit in the cloud cannot be reached, receipts are created with or without a provisional signature. These vouchers are labelled accordingly on the printout and must be subsequently reported. At least the employee authorisation 'Cancellation' is required to process the following messages

You will see the message "TSE not available" on the receipts issued. In the cash register interface, please click on the **i** in the top right-hand corner of the icon bar. You will find more detailed information there and see all incidents to which you need to react in the view. Example display:

Once all conflicts have been resolved, the display looks like this, for example:

EPSON TSE Connection in the Operational Environment of the Taxable Company

EPSON Printer TSE

The fiscal solution from Epson is integrated into the existing MY POS environment and offers conformity with the German law for protection against manipulation of basic digital recordings. With the combination of Epson's Technical Security Device (TSE) and the matching printers, BSI requirements can be implemented easily and efficiently. The TSE also serves to upgrade existing printers.

The TSE unit is available as a microSD card and can be easily combined with your personalised SD or USB adapters. It supports up to 8 million signatures and features a full three-year validity of the certificate.

Epson fiscal printers of the following series are available:

- TM-m30f with TSE (Lifetime 3 Years/ 8 Mio Signatures)
- TM-T88VI-iHub mit TSE (Lifetime 3 Years/ 8 Mio Signatures)
- Upgrade of existing TM-M30 printers
- Epson Fiscal Modul Kit, incl. TSE

EPSON Server TSE

The Epson TSEs can also be operated within the operational network instead of in receipt printers: as long as they represent the operational environment of the taxpayer and are under physical control of the taxpayer.

The server-based fiscal solution from Epson is seamlessly integrated into existing network environments and offers complete independence from cash register or software systems. The combination of server system and Epson USB-TSE is one hundred percent compliant with the German law for protection against manipulation of basic digital records. The server systems optionally support up to three or eight TSE modules. The latter, in combination with an optional mounting kit, even allows integration in standard 19-inch server racks - perfect for expanding existing network infrastructures.

Both TSE servers can be easily connected via Ethernet interface. Commissioning and maintenance is carried out via a web-based configuration service, thus offering simple and location-independent device management. The practical USB TSE complies with the guidelines of the German Kassensicherungsverordnung (KassenSichV). It also complies with the technical guidelines TR-03153 of the BSI.

- Epson EPS TSE Server 3 with three Epson TSE, USB (20 Mio. Signatures, Lifetime: 5 years)
- Epson EPS TSE Server 8 mit acht Epson TSE, USB (20 Mio. Signatures, Lifetime: 5 years)
- Rackmount

Commissioning

1. Order of EPSON fiscal printers or modules to upgrade existing receipt printers
Alternative: Order of EPSON Server TSE min. one TSE Server 3 per property or TSE Server 8 in data centre
2. on-site installation (printer upgrade or new installation, or network integration into the local network)
3. MY POS Setup: First, all TSE to be used are configured and initialized by MY POS.

Each cash register is assigned a unique TSE; in the case of less busy sales outlets, several cash registers can communicate with one TSE.

All legally required exports, the additional archiving and storage of TSE and POS data over the period of time for which retention is mandatory is carried out within the MY POS POS system.

The screenshot shows the 'PMS-Anbindung' (PMS Connection) configuration page. It includes dropdown menus for 'PMS-Anbindung' (set to 'Protel (POSXML)') and 'Fiskalisierung' (set to 'EPSON TSE'). Below this is the 'Essenszeiten' (Meal Times) section with a grid of time selection fields for breakfast, lunch, snack, and dinner. Further down are expandable sections for 'Rabatte und -Namen im Betrieb' and 'Einstellungen für die PMS-Anbindung'. The main section is 'Technische Signatureinheiten (TSE)', which contains a table with columns for Name, IP Adresse, Port, Device ID, and Datum der Initialisierung. At the bottom of this section are buttons for 'TSE konfigurieren' and 'Finanzprüfung anlegen'.

The screenshot shows the 'TSE Konfiguration' (TSE Configuration) page. At the top, there are search and navigation buttons: 'Suche starten', 'Erweiterte Suche', and 'Neuen Eintrag anlegen'. The page is divided into several sections:

- Betrieb:** Based on IT GmbH - MPEHotel 1
- Verkaufsstelle:** Alle Verkaufsstellen des Betriebs
- Name:** A text input field with a placeholder '(z.B. "Epson Rezeption")'.
- Verbindungsdaten:** Fields for 'IP Adresse', 'Port' (set to 8009), and 'Device ID' (set to local_TSE).
- Authentifikation:** Fields for 'PUK' (hm_iZs), 'Admin PIN' (5gb-7), 'Secret key' (9a_RzrT), and 'Time Admin PIN' (x5ZDj).
- TSE Timeouts:** Fields for 'Admin Timeout' (900), 'Time Admin Timeout' (28800), and 'Export Timeout' (100). To the right of these fields are explanatory text blocks: 'Gültiger Bereich: 900 bis 7200 [sec] (15 Minuten bis 2 Stunden). Standardwert 900 [sec]', 'Gültiger Bereich: 900 bis 86400 [sec] (15 Minuten bis 24 Stunden). Standardwert 28800 [Sek] (15 Minuten bis 24 Stunden)', and 'Gültiger Bereich: 100 bis 330 [sec]. Standardwert 100 [sec]'.
- Export Zeitpunkt:** A time selection field set to 05:00 with a help icon. To the right is the label 'Zeitpunkt des letzten Exports' with the value 'n/a'.

 At the bottom of the page are buttons for 'TSE Konfiguration speichern' and 'Abbruch'.

Austria: Registrierkassenverordnung

Integration der Fiskaltrust SignatureCloud

In accordance with the regulations in Germany, Austria and France, cash registers require the use of a certified security device. It is required that each receipt of cash transactions is given a cryptographic signature that is related to the signature of the last receipt and that data acquisition protocols (RKSv-DEP/ DSFinVK) with total storage must be kept. Based on IT as manufacturer and distributor is partner of EPSON and partner of the Fiskaltrust GmbH.

The use of Fiskaltrust SignatureCloud - we recommend that you make use of the annual carefree packages - is tied to your registration as a cashier operator and purchase of a Fiskaltrust product.

Please note the legal information.

Connection of Fiskaltrust Signature Cloud on Property

If your hotel requires a connection to Fiskaltrust, you can configure this in the operating settings. Go to "Master Data", then "Property". Select Austria as country. To edit the following setting, you must have Admin or Property Admin authorisation.

Fiskaltrust does not provide for a daily closing Z-report, but it is still useful for checking the cash balance.

Data Recording Protocol E 131

In addition to the new protocol in accordance with the RKSv, which you can download from your personal portal at Fiskaltrust, the additional DEP in accordance with E 131 is available, which contains the quantities and commercial designations of your sales.

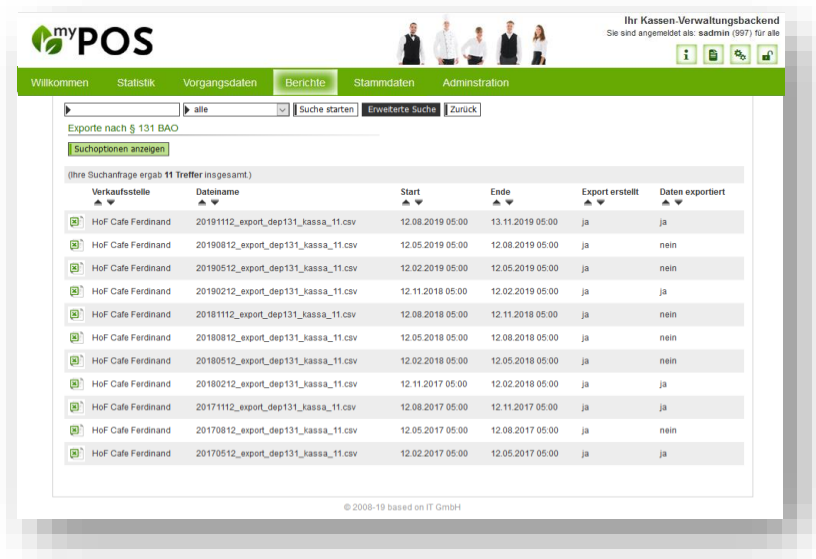

You will find the exports in the MY POS Administration under the item 'Reports'. Click on the button 'Exports §131 BAO'.

The screenshot shows the 'my POS' administration interface. The top navigation bar includes 'Willkommen', 'Statistik', 'Vorgangsdaten', 'Berichte', 'Stammdaten', and 'Administration'. The 'Berichte' menu is open, showing options: 'Abschläge', 'Finanzberichte', 'fiskaltrust Meldungen', and 'Exporte § 131 BAO'. Below the menu, a search bar contains 'Suche nach Fiskaltrust Events' and a dropdown menu is set to 'alle'. A table displays search results for 'Fiskaltrust Events'.

Betrieb	Event	Status	Datum
Österreich	Verbindung zur CashBox nicht möglich	Nacherfassung steht aus	16.07.2019 (16:00:03)
Österreich	Monatsbericht fällig	Bericht steht aus	20.04.2018 (10:07:19)

Here you will find a list of all automatically generated monthly exports, which by law must be downloaded at least every three months and additionally saved on a drive of your choice.

Post-Registration of transactions due to technical problems

If your Internet connection is down, or the Fiskaltrust interface or the signature creation device in the cloud is not available, documents are created with or without provisional signature. These documents are marked accordingly on the printout and must be reported subsequently.

You will see a notification: "**fiskaltrust: xxxxxx**" in the MY POS Cashpoint Touchscreen. Please go to the MY POS administration to the tab 'Reports' and 'Fiskaltrust Messages'.

The fact that the connection is active again must be confirmed by sending a so-called 'zero receipt'. If there are any documents to be subsequently registered, this is done in unit with the subsequent registration of the documents - we automatically send a zero document for closing.

Otherwise the connection to Fiskaltrust can be reactivated at any time by sending a zero receipt.

Find more information at www.fiskaltrust.de/faq/

Italy: Integration of Epson Fiscalprinters

Epson Fiscal printers may be used in combination with the integrated Epson e-POS-fiscal.device Web Socket. Due to the fiscal regulations, every cash-point needs its own fiscal printer. Whereas regular network printers simply process and print MY POS print files, fiscal printers store a lot of relevant date internally.

Fiscal printers provide invoice numbers, cumulate totals and specify information on the printed documents. Therefore, changing the order of the given information on the receipts and cashpoint reports is limited.

At the bottom of this document, you will find the fiscal and non-fiscal printouts. You will see, which terms may be managed by localization in MY POS.

Edit Property

Using the Italian fiscal printer „Epson FP-90III“ is done by activating it in the property. Whenever you choose the country Italy (IT), the option ‚Use Fiscal-Printer‘ will be shown. First of all, make sure it is checked, before you process with all following settings.

Edit printers

Like all other printers, fiscal printers are managed in Admin -> Edit printers. Due to the fact, that fiscal printers do not use certain control characters, we added a new entry ‚Fiscal Printer‘ to the settings for ‚Operating System‘.

- Name: Please enter an explicit name
- Property: Choose the corresponding property
- Printer Path: Every Fiscal printer must be integrated as a network printer, therefore please enter the IP address.

Edit Printer

Name: (e.g. "Epson pool bar")

Operating System: (highlighted with a red box)

Printer Path: (Win: "[WORKGROUP]/[COMPUTERNAME]/[SHARENAME]\$"
(Lin: "[SHARENAME]"
(Eth: "[IP-ADDRESS]"
(Fiscal Printer: "[IP-ADDRESS]"))

Property:

Edit Outlets

Unlike regular network printers, every cash point needs its specific fiscal printer. Therefore, in properties and outlets using fiscal printers, the configuration of printers is limited to the settings for regular printers. Fiscal printers may not be used as kitchen printers, so you will not find them here.

Edit Cash-Points

As mentioned above, in Italy, every cash point needs its specific fiscal printer. Therefore, all specific settings and mappings are managed here and you can only choose fiscal printers.

Edit Cashpoint

Outlet: Restaurant

Name: Main Cashpoint

Save Changes | Cancel

Fiscal printers need a lot of additional settings to work properly. The MY POS data must be mapped according to the printer data.

User Mapping Fiscal-Printer

All MYPOS Users (service staff), that shall be able to post at this cash point must be related to a specific internal Epson printer operator:

Name	Operator	Delete
Andreas Olenberg	Operator 1	<input type="checkbox"/>
Gerhart Lauter	Operator 2	<input type="checkbox"/>
Please choose a user	Please choose an operator	<input type="checkbox"/>

Payment Method Mapping Fiscal-Printer

All MYPOS payment methods must be related to the fiscal printer's payment types. The following types are possible:

- 0 = Cash
- 1 = Cheque
- 2 = Credit or credit card
- 3 = Ticket

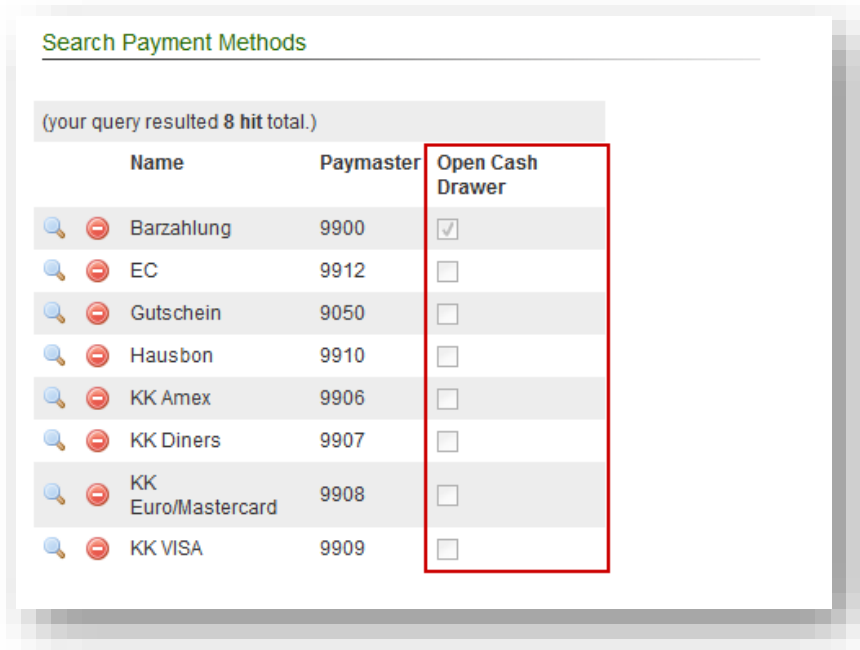

The payment type „Non Fiscal“ must be chosen for the payment method „On the house“, which must be set up as external payment method in MYPOS (this applies only for using fiscal printers, in all other cases, 'on the house' postings are internal payment methods). All Non-Fiscal payment methods will be printed without invoice numbers.

Payment Methods Mapping Fiscal Printer		
Payment Method	Payment Method Fiscal Printer	Delete
Barzahlung	Cash	<input type="checkbox"/>
KK Diners	Credit or Credit Card	<input type="checkbox"/>
KK Amex	Credit or Credit Card	<input type="checkbox"/>
EC	Credit or Credit Card	<input type="checkbox"/>
Hausbon	Non Fiscal	<input type="checkbox"/>
Please choose a payment method ▼		<input type="button" value="+"/>
Please choose a payment method ▼		

All cash point settings will have impact on the touchscreen view. If a fiscal printer is used, only those waitresses and waiters, that are mapped to the operators in the printers, will be able to log in. The same applies to payment methods. Items are only shown, if the tax rates and corresponding departments are set correctly.

Cash Drawers

Go to Admin -> Edit External Payment Methods, and you will find, that you may choose, if a cash drawer shall be opened, when the receipt is printed.

Search Payment Methods

(your query resulted 8 hit total.)

Name	Paymaster	Open Cash Drawer
Barzahlung	9900	<input checked="" type="checkbox"/>
EC	9912	<input type="checkbox"/>
Gutschein	9050	<input type="checkbox"/>
Hausbon	9910	<input type="checkbox"/>
KK Amex	9906	<input type="checkbox"/>
KK Diners	9907	<input type="checkbox"/>
KK Euro/Mastercard	9908	<input type="checkbox"/>
KK VISA	9909	<input type="checkbox"/>

Adding a Lottery Code

If a property is set to Italy – Fiscalization and the outlet uses a fiscal printer, the service will be able to enter a lottery code via barcode scanner or an attached keyboard.

To enable the lottery code entry, please click on the 'Enable' button and the scan or enter your guest's lottery code.

The screenshot shows a POS interface with a checkout confirmation screen. At the top right, it displays '1x Wiener Schnitzel.. 7,02' and 'HH (-10%)'. The main area contains a table with checkout details:

Outlet:	HoR Restaurant	Employee:	Francesco Totti
Total:	7,02 EUR	Table No.:	-
Payment via:	Mastercard	Guestname:	-
Reduction:	0%	Discount:	0%

Below this is a 'Please Confirm Checkout' section with a 'Codice Lotteria:' field containing 'ABCD1234X' and an 'Enable' button. A 'Details:' section shows:

Table No.:	-
Payment via:	Mastercard
Discount:	0%
Total:	7,02 EUR

At the bottom of the confirmation screen is a large 'OK' button. To the right is a numeric keypad with buttons for digits 0-9, a comma, a dash, and function keys 'C', 'X', and 'OK'. A 'Cancel' button is also visible at the bottom of the keypad area.

Backend Re-Printing of Receipts

Using fiscal printers affects the following receipts:

Re-Printing an Invoice

Choose the transaction you wish to reprint. In case, that the transaction number comes from a property, where a fiscal printer is used, the copy must be printed on the same printer, where the original receipt was printed. Therefore, you can only choose the corresponding fiscal printer to print the copy. Please note, that the copy of the original fiscal receipt is now marked as Non-Fiscal. In this way, only the number of receipts are summated.

Printing an Entertainment Expenses Receipt

According to the practice mentioned above for invoices, a copy will be marked as a Non-Fiscal Receipt, but will contain all details ready to be filled out for the fiscal statement.

Re-Printing of X-Reports

When using fiscal printers, this option is not allowed. So, you will find that Italian properties are missing in the drop-down list.

Re-Printing of Z-Report

Unlike the X-report, Z-reports may be reprinted, but there are limitations: you may only choose a certain date (if two reports were originally created on that date, both are reprinted). You may not search by Cashpoint Report ID. Please note, that the copy of the original fiscal receipt is now marked as Non-Fiscal.

Impact on the Cash Point's Touchscreen

You will find, that the amendments for the fiscal printers will cause the following changes of the cash-point touchscreen's view:

- Only users, which are mapped to the printer's operators, will be shown
- Only items with tax rates, that are mapped to the printer's departments, will be shown
- Only payment methods, which are mapped to the printer's payment methods, will be shown
- The internal payment method 'On the House' may not be used. Workaround: Define it as external payment method and change the setting in the Cash-Point Management to Non-Fiscal
- All transactions, which were paid with an external payment method, will be printed as Fiscal Receipts. All transactions, which are not paid as an External payment method, or explicitly defined as Non-Fiscal, will be printed as Non-Fiscal receipts
- Cancelled items of open tables/ transactions are printed as Non-Fiscal receipts
- Minus postings paid via an internal payment method are printed as Non-Fiscal receipts
- Minus postings paid via an external payment method are printed and posted as credit notes
- Cancellations of items of reopened tables/ transactions will be posted and printed as credit notes
- Printing positions of open tables or transactions will be marked as Non-Fiscal on the receipt
